First steps

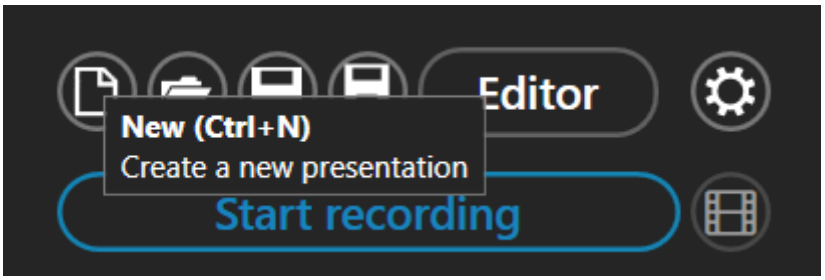

- How to turn the studio on?
- How to open a presentation?
- How can I access my existing presentation in the studio?

How to turn the studio on?

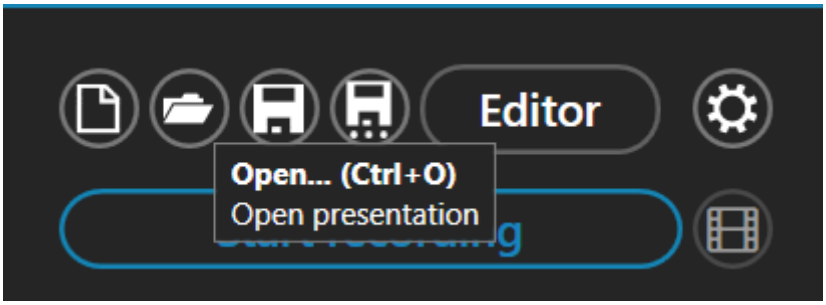

1. Go into the studio and turn on the studio computer. If you turn on ceiling lights (or any outer light source not related to the studio), don’t forget to turn it off after turning the studio lights on. This is absolutely necessary!
2. Log in to your Windows account.
3. Run the Jalinga Studio app.
4. In the left part of the main page of the app there is a switching indicator. Click it to activate the studio.
5. You are ready for recording!

How to open a presentation?

Create a new presentation by clicking the first icon. This way you can create slides in the editor mode from scratch

Open an existing presentation by clicking on the second icon.

How can I access my existing presentation in the studio?

You can download it to your studio computer any way you like

1. Use a flash drive
2. You can send your presentations and files via email and download them any time you need. Don't forget to have a studio e-mail address ready and active on your studio computer.
3. Use any cloud storage: upload your existing presentations from your personal computer there and download them to the studio computer any time you need
