How can I access my existing presentation in the studio?

You can download it to your studio computer any way you like

1. Use a flash drive
2. You can send your presentations and files via email and download them any time you need. Don't forget to have a studio e-mail address ready and active on your studio computer.
3. Use any cloud storage: upload your existing presentations from your personal computer there and download them to the studio computer any time you need
